Barrow Hanley Global Share Active ETF (ASX: GLOB)

Updated estimated ongoing annual fees and costs reflecting the financial year ended 30 June 2026

This document should be read in conjunction with the current Product Disclosure Statement issue number 2 dated 17 March 2025 (PDS) for Barrow Hanley Global Share Active ETF (ASX: GLOB) (Active ETF).

Ongoing annual fees and costs

The total ongoing annual fees and costs for the Fund comprises:

- management fees and costs
- transaction costs.

The following table provides updated estimated ongoing annual fees and costs based on updated estimated management costs and updated estimated transaction costs reflecting the latest completed financial year ended 30 June 2026.

Ongoing annual fees and costs may vary in future years.

Updated estimated ongoing annual fees and costs reflecting the financial year ended 30 June 2026

Active ETF	Management fees and estimated management costs		Estimated transaction costs (% pa)[2]	Estimated total ongoing annual fees and costs (% pa)
	Management fees (% pa)	Estimated management costs (% pa)[1]		
Barrow Hanley Global Share Active ETF	0.99%	0.00%	0.16%	**1.15%**

1 Since we currently choose to pay normal operating expenses out of our management fees, estimated management costs represent any abnormal operating expenses recovered from the Fund and any other indirect management costs for the financial year ended 30 June 2026, which may vary in future years without notice.

2 Estimated transaction costs represent total **gross** transaction costs incurred for the financial year ended 30 June 2026. Where applicable, the stamp duty component of transaction costs is equal to one-seventh of our reasonable estimate of stamp duty that may have been incurred during that financial year. Transaction costs may vary in the future without notice. **Transaction costs should not be considered in isolation of investment returns.** It is important to understand that actively managed investments are likely to have higher transaction costs than passively managed investments, such as index funds, because of the higher expected volume of trading of the portfolio's assets in generating investment returns.
